

Thursday May 28th

I struck carbonate ore in the Lost cabin drift this afternoon. Elmer & Mary went over to West's with me this morning & Elmer helped me drill a two foot hole in the drift this forenoon. The shot tore out about 2 tons of rock.

Friday May 29th

100 inches Crystal Pointe ---- 1 trip
at 5:00 o'clock this morning I started in the canoe & returned at 8:20 o'clock. I went to the new crystal pocket between the second & third division of Crystal Palace & brought out a can full of the specimens from the pocket. Capt. A. M. Willard came over this morning & was here yet when I started to Hot Springs for the mail. I got to the Springs at about noon & started back about 3:00 o'clock. Father & I went over to Ann Willard's this evening & found W.W. Ole there. We had to start back soon on account of threatening rain. It is now raining outside.

Saturday May 30th

I slept the most of the forenoon away & got up about 12 o'clock. I started out in the country for a walk at 12:15 P.M. & went on the top of the four mountains (the tenth West one of them) North of here about 2 miles. I came back past J.B. West's place & cut two of one set of mine timbers for the Lost cabin drift. Mary was on to West's this evening.
